

Proposed Heavy-Duty Vehicle Green House Gas Regulation

**Public Workshops
May-June, 2008**

California Environmental Protection Agency
CEQA/ATP Resources Board

Overview

- Background
- California GHG Emissions
- Proposed Requirements
- Cost and Benefits
- Next Steps

2

Global Warming Solutions Act of 2006 - AB 32

- Goal to reduce GHG emissions to 1990 levels by 2020
- Mandates the Board to develop appropriate regulations and enforce the new regulations
- Develop early action measures enforceable by 2010 to reduce emissions in the short term

A comparison of Lyell Glacier, Yosemite National Park in 1903 (top) taken by G.K. Gilbert, and 2003 (bottom) taken by Hassan Basagic.

3

California GHG Emissions

2004 Emissions (480 MMT CO₂E)

ARB, "California 1990 Greenhouse Gas Emissions Level and 2020 Emissions Limit" (2007), www.arb.ca.gov/cc/ccel/inventory/1990_level.htm

4

Transportation Emissions

2004 Emissions (182 MMTCO₂E)

Heavy duty = heavy duty fleet, gas & diesel (light-heavy through heavy-heavy duty trucks, as well as all buses and motorhomes)

5

Goals of Regulation

- Reduce GHG emissions by improving long-haul tractor and trailer efficiency
- Requirements based on US EPA's existing SmartWay Program
 - Improve tractor and trailer aerodynamics
 - Reduce rolling resistance
- Focus on California and out-of-state registered long-haul tractors pulling "box-type trailers"¹

¹Box-type trailer includes dry van, refrigerated van, and curtain-side van

6

PROPOSED REQUIREMENTS

7

Applicability

- Long haul heavy-duty tractors
- Box-type trailers - 53' or longer:
 - Dry van
 - Refrigerated van, and
 - Curtain-side van
- California and out-of-state registered
- Drivers, Owners, Motor Carriers
- California based businesses that ship or receive freight in 53' or longer box-type trailers

8

Exemptions

- Authorized emergency vehicles
- Military tactical vehicles
- Short haul tractors
 - Operation within 100 mile radius of home base and maximum of 50,000 annual miles
 - 53' or longer box-type trailer hauled by an exempt short haul tractor
 - Reporting requirements
- Container Chassis
- Drop Frame Vans

9

Tractor Requirements

2011+ MY Tractor Pulling Box-Type Trailer (≥53')

Compliance Date: 1/1/2010

Tractor Type	Requirement	Tire
Sleeper Cab	SmartWay Certified Tractor	1.5%
Day Cab/Sleeper Cab	SmartWay Approved Tires	1.5%

Pre-2011 MY Tractor Pulling Box-Type Trailer (≥53')

Compliance Date: 1/1/2012

Tractor Type	Requirement	Tire
Day Cab/Sleeper Cab	SmartWay Approved Tires	1.5%

New Trailer Requirements

2011+ MY 53' or Longer Box-Type Trailer

Compliance Date: 1/1/2010

Trailer Type	Requirement	Aero	Tires
Dry Van	SmartWay Certified Trailer, OR Retrofit with SmartWay Approved Technologies to meet SmartWay Spec.	5%	1.5%
Refrigerated Van		4%	1.5%
Curtain-side van		5%	1.5%

11

Existing Trailer Requirements

Pre-2011 MY 53' or Longer Box-Type Trailer

Compliance Date: 1/1/2014

Phase-in compliance schedule for fleets with 20+ trailers

Trailer Type	Requirement	Aero	Tires
Dry Van	Retrofit with SmartWay Approved Technologies	5%	1.5%
Refrigerated Van		4%	1.5%
Curtain-side Van		5%	1.5%

12

Existing Trailer Requirements

Phase-in Compliance Schedule				
Fleet Size	Date Percent of Fleet is Required to Comply			
	1/1/2011	1/1/2012	1/1/2013	1/1/2014
1 to 19	---	---	---	100%
20+	20%	40%	65%	100%

13

Trailer Requirements Compliance Example

Trailer Type	To meet the aero requirement	Tires
Dry Van or Curtain-side Van	Side skirts (4%), Either the front or rear fairing (1%), OR	1.5% Low rolling resistance duals or Single wide tires
	Trailer tail fairings (5%)	
Refrigerated Van	Side skirts (4%)	

14

Maintenance Requirements

- Maintain SmartWay certified equipment in “Good Operating Condition”,
- Installed SmartWay certified equipment not in “Good Operating Condition” considered a violation of the regulation subject to penalty in accordance with the regulation

15

Responsibilities

- **Driver**
 - Ensure vehicle is compliant with the requirements
 - Present motor carrier (MC)/broker information and bill of lading upon request by enforcement personnel
- **Owners of tractors/trailers**
 - Responsible for retrofitting vehicle
 - Ensure MC/broker information is on dispatched tractor
 - Register trailers in ARB database
- **Motor Carrier/Broker**
 - Provide copy of regulation to driver/owner of tractor/trailer
 - Dispatch compliant tractor/trailer to California
 - Ensure MC information and bill of lading is on dispatched tractor
- **California-based Shippers and Receivers**
 - Ensure vehicle is compliant with the requirements

16

Recordkeeping/Reporting

- Local Haulers (updated annually)
 - Tractor ID (License plate and/or VIN)
 - Annual VMT of Tractors (50,000 mile annual limit)
 - Geographic Area (100 mile radius from base)
- All box-type trailers subject to Regulation required to register unless compliant by 2010

17

COST AND BENEFITS

18

Costs and Benefits

- Substantial fuel savings: 8% to 11%
 - Trailer ~ 6.5% (5% aero, 1.5% tires)
 - Existing Tractor ~ 1.5% (tires)
 - SmartWay Tractor ~ 3.5% - 4.5% (Compared to a tractor with some aerodynamic features such as roof fairings, cab side extenders, sloped hood, etc)*
- Over 1,100 gal/yr @ 6 mpg & 100k mi
- Total installed cost: \$7,000 to \$9,000
- Total payback period up to 2 years
 - Diesel fuel costs @ \$4/gallon
 - Longer payback for multiple trailers

19

*The SmartWay tractor can get 10% to 20% better fuel efficiency compared to a traditional tractor

Enforcement

- Loading Dock and Roadside Enforcement
 - Driver
 - Truck and Trailer Owners
 - Motor Carrier/Broker
 - California Shipper/Receiver of Freight
- Focus of Compliance Through California Shippers/Receivers
 - More equitable for trucking industry and leaves choice to them
 - Better enforceability metric
 - Initial cost more likely to be passed on to CA consumers, rather than truck owners
 - Cost of shipping expected to provide CA consumer savings over life of regulation

20

	<h2>Next Steps</h2>
	<ul style="list-style-type: none"> – Public Workshops <ul style="list-style-type: none"> ■ GHG Regulation Workshops: June 2008 ■ Focus on Shippers/Receivers – Ongoing meetings with Stakeholders – Presentation to Board for Approval (October 2008)
